GREAT FLIGHT CONNECTION

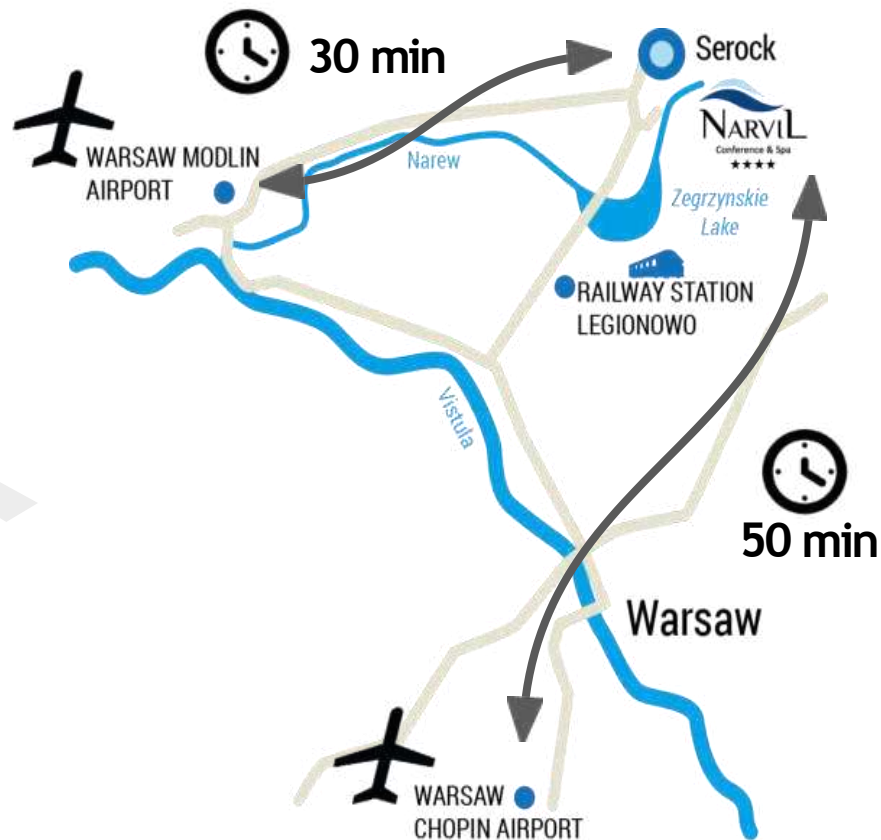

Access to Hotel Narvil Conference & Spa

Hotel Narvil is located about 40 km from the center of Warsaw, in Serock on the Narew River.

The proximity of route 61 ensures a quick and efficient connection with the capital.

The hotel has a car park with 350 spaces. There is also a place to park coaches.

Thanks to the direct connection to the Żerański Canal and Lake Zegrzyński, in the summer season the hotel can also be reached by water tram, running from the marina in Żerań, Warsaw.

DESIGN INSPIRED BY NATURE

Narvil Hotel was built in the complete harmony with nature, which has been an inspiration for both the hotel name and its interior design. Everywhere you will see the unusual references to **two hotel symbols: water element and forest serenity**.

OUR GREEN POLICY

Closer to nature - to take care of our environment

MINIMUM WASTE

In our coffee breaks you will not find water in plastic bottles - instead, you can enjoy clean water from our own deep well. Better for your health and the environment.

REUSE WHAT'S USED

We say NO to collecting trash - we segregate waste and strongly focus on recycling.

"I'm here because of Narvil Hotel!"

READY FOR ECO CARS

Electric cars are increasing in popularity on Polish streets.

WE PLANT THE FOREST

We take care of our own green area around the hotel, but we also plant new trees around -like this green alley in Zegrze.

SMART ENERGY MANAGEMENT

Thanks to our intelligent BMS (Building Management System) utilising photocells located on the corridors, we only use the energy that we need, minimising unnecessary losses.

MAXIMUM DAYLIGHT

In the initial phase of the project, the hotel was equipped with large glazed spaces - increasing the availability of daylight, which minimizes our electricity consumption.

OUR **GREEN** POLICY

What next steps are we planning for the next years?

LESS PLASTIC

Instead of bottled water in our hotel rooms, our guests enjoy fresh water from our own source.

RENEWABLE ENERGY

Solar cells will be installed on the roof of our parking lot, which will allow us to supply a part of our energy without interfering with the environment.
